Curious about astrology?

Then find out what it is and how it can help you by doing this course.

What can astrology do?

Properly used, astrology gives help and guidance. Astrology can be used for decision making and guidance in financial matters, relationships, house buying, selling or moving, looking for work, changing jobs or careers.

Astrology can give us information about the present and future of a situation to expand and deepen our understanding of it.

It can awaken us to future possibilities but action is required to make these possibilities a reality.

Astrology is far more than reading a horoscope in a newspaper . An astrology chart is an individual map of the heavens as they appeared at your birth place at the moment of your birth.

A knowledge of astrology can give you a better understanding of yourself. It awakens you to your strengths and weaknesses and shows your future possibilities including your family & friends.

What astrology does not do?

The astrology does not take away your free will. Your future depends on your actions.

It does not predict the future but shows what future energies will be affecting you and alerts you to the best time to take action in relationships, finances, work, etc.

The Course:

The course starts by learning the meanings of the sun signs, houses, planets, aspects, and transits. This is a practical course and you will be using your own natal chart to practice on throughout the course.

Your Teacher Anne
